Acres of Orchids

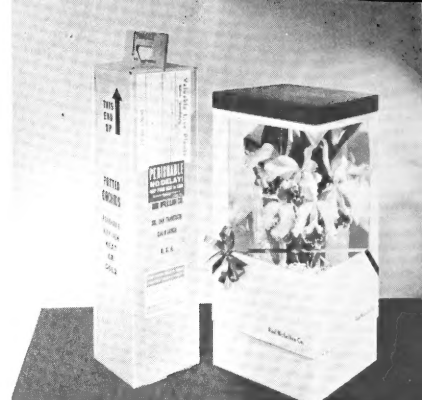

DO-IT-YOURSELF SPECIAL OFFER

Rod McLellan Co.
1450 EL CAMINO REAL
SOUTH SAN FRANCISCO, CALIFORNIA, U.S.A.

Policy

It is our policy to give you all the information we are able to give on anything that we sell; to fill your orders with the same care you would use if you were making your selection personally, and to give you any help with your cultural problems that we are able to give, free of charge. We will welcome any suggestions that you might have from time to time for improvement of our service to you.

Distant Local

Pot it yourself and save postage

Special Offer for Mail Order Customers

We are as close to you as your mailman, whether you live fifty or fifteen hundred miles from "Acres of Orchids"! We will ship any plants as listed below **POSTAGE FREE**, if you instruct us to ship **without buds or blooms**, and **out of pot**.

As pictured above, plants sent complete with stake and tie, plus sufficient WONDERBARK, the new product which takes the mystery and effort out of potting (see page 23), and complete instructions for potting in your own pot.

Do-It-Yourself, and Save Shipping Costs on:

Any 4 inch seedling.

All Flowering Size Cattleyas (Listed on pages 3-8) priced at \$15.00 or less.

All Flowering Size Cypripediums (Listed on pages 14-15) priced at \$15.00 or less.

Unestablished "zombie" botanicals, see pages 12-13 for details.

Offer applies only to shipments for destinations in U.S.A. or Canada.

For easier purchasing

BUDGET PLAN—Enjoy your plants NOW, pay for them over four, six or twelve months. No extra charges, make one large purchase and **EARN THE QUANTITY DISCOUNT**, see details below.

QUANTITY DISCOUNTS FOR LARGER PURCHASES—

\$ 50.00 - \$ 200.00.....	10% off
200.00 - 500.00.....	20% off
500.00 - 1000.00.....	30% off
1000.00 - and up.....	35% off

Rodco, The Budget Man

These are the only discounts given . . . whether to **COMMERCIAL** or **AMATEUR** growers

SPECIAL QUANTITY DISCOUNTS AVAILABLE ON MATERIAL OTHER THAN PLANTS

Write for Details

Shipping

We ship via **RAILWAY EXPRESS**, unless otherwise directed, and **guarantee safe arrival**. Air shipments are about twice the cost of rail shipments, except for larger orders designated for metropolitan points, when favorable air freight rates are usually obtainable. Should your **plant arrive damaged** please request inspection from the carrier, and **SEND THEIR REPORT TO US**. We will replace damaged plants, **BUT NEED THIS CARRIER REPORT TO DO SO**.

Orders received after the Christmas shipping season, 1957 which are destined for the colder areas of the world, will be **HELD FOR SHIPMENT** until March 15th, **UNLESS CUSTOMER REQUESTS SHIPMENT AT HIS OWN RISK**. The same applies to shipments where route in transit is into the colder areas.

Special "catering" services

Our ranges, as one of the most extensive importing, exporting and hybridizing orchid firms in the world, is geared to service every need of the orchid collector. We shall be glad to send full information on any of the following upon request.

REPOTTING SERVICE for local growers. Charges are minimum, based on the size of the pot the plant is put into., i.e. a 6 inch pot is \$1.00 complete.

ORCHID-OF-THE-MONTH-CLUB: A magnificent gift, seven plans which you may vary to suit yourself, at generous discounts.

COLORED SLIDES AVAILABLE: Prepared notes go with these, to make an interesting program for garden groups, clubs, etc.

ORCHID PUBLICATIONS AND SOCIETIES: We will accept applications for memberships to the American Orchid Society, and the California Orchid Society, as well as for the local Peninsula and San Francisco orchid groups.

LECTURE SERVICE TO CLUB GROUPS: By prearrangement (we ask at least 30 days' notice) we will send one of our experienced orchid growers to your local group for interesting talks on orchids and orchid growing.

SPECIAL GROUP TOURS: By advance reservations, call Plaza 6-0330, or write for tour folder.

Conditions of sale

WE MAKE NO SUBSTITUTION WITHOUT YOUR PERMISSION, unless given instructions to do so on your original order.

PLANTS SUBJECT TO PRIOR SALE.

PRICES SUBJECT TO CHANGE.

TEN DOLLAR DELIVERIES FREE WITHIN TWENTY-FIVE MILES. OTHER SHIPMENTS F.O.B. SOUTH SAN FRANCISCO.

CALIFORNIA DELIVERIES subject to 3% State Sales Tax.

CREDIT??? Gladly. Send us your telephone number, two business references (your bank will do for one), the name and address of your employer or business.

FLOWERING SIZE CATTLEYS

As priced below, these plants are shipped in bud when ordered in season, potted, and ready to grow. Should you wish to take advantage of our special Do-It-Yourself offer, as explained on the inside front cover, you can save shipping charges by having plants sent out of season, and out of pot — usually about 20% on prices listed below.

Our prices are based, first, on the SIZE and QUALITY of blooms; secondly, on the number of leads, and to some extent, the size of the pot. Various combinations of these factors result in price RANGES for the same pot size.

When two prices are shown opposite a pot size, intermediate prices are available. IT WILL SAVE TIME IN FILLING YOUR ORDERS IF YOU WILL STATE THE RANGE OF PRICES ACCEPTABLE FOR ANY VARIETY SELECTED, AND WHETHER OR NOT WE MAY SUBSTITUTE.

Name	Parentage and Description	Size	Price	Name	Parentage and Description	Size	Price
C. ACOLITA (C. Trimos x C. Tityus)—Medium lavender petals and sepals. Good dark labellum with yellow eyes in throat—Spring.		5" 6"	\$ 7.50 - \$12.50 10.00 - 15.00	C. BELGICA (C. Enid x C. Remy Cholet)—Medium lavender, with a dark magenta labellum—Winter.		5" 6"	\$ 7.50 - \$10.00 10.00 - 15.00

BC. BILEE

ONE PLANT FREE

FOR EVERY TWO YOU PURCHASE FROM THIS PAGE

For every two plants ordered from the listing below, we will send another hybrid Cattleya of equal value to those you purchase, which we will select from our ranges, under the following rules:

1. We reserve the right of substitution.
2. We guarantee to send a plant of equal or better quality for the bonus plants, or on substitutions.
3. All plants must go to the same address, no split shipments permitted.

Since the supply of plants is strictly limited for each listing, it would be wise to send us several alternate choices. All plants are first quality, hybrid Cattleyas, which will make better-than-average additions to any collection. We are making this offer only to clear out odd-lot varieties, to reduce the cost of inventory.

REGULAR QUANTITY DISCOUNTS DO NOT APPLY

Pot Sizes: Five, six and seven inch pots.

Price Range: Indicates quality and size.

ROD McLELLAN CO. SEEDLINGS

Well grown seedlings from selected parent plants, any of these hybrids should produce flowers which will be a welcome addition to any collection, whether commercial or amateur. Many crosses may be controlled as to flowering season, and are indicated CONTROLLABLE.

Minimum Order \$5.00 Community Size Shipped Out of Pot, Prepaid
(Postage will also be paid on other sizes shipped out of pot)

Lavender

Cross No.	Description	Pot Size	Price
1965	LC. BUCCANEER X LC. MARY ROSE V. EXQUISITA, A.M., A.O.S.—Large dark flowers, with a solid dark red-purple labellum should result—Fall.	3" 2 1/4"	\$6.00 4.00
1983	LC. BACCHANTE X LC. CUESTA, A.M., A.O.S.—The Cuesta parent with its characteristic dark lip combined with Bacchante should produce large dark flowers with fine lip coloring—Fall.	2 1/4"	4.00
2001	C. PROSPECTOR X LC. MARY ROSE V. EXQUISITA, A.M., A.O.S.—Large dark flowers of consistent good quality should result—Winter.	3"	6.00
2002	LC. CUESTA X C. LABIATA—Cuesta parent combined with selected labiata should produce fine light to medium flowers. CONTROLLABLE—Fall.	2 1/4" Com. Pots	2.50 1.00
2019	LC. TOCCATELLA X LC. MARY ROSE V. EXQUISITA, A.M., A.O.S.—We predict large flowers, with excellent substance and good, dark color—Winter and Spring.	2 1/4" Com. Pots	2.50 1.00
2024	LC. BABYLON X C. LABIATA—Fine production of large, medium dark flowers. CONTROLLABLE—Fall.	2 1/4" Com. Pots	2.50 1.00
2083	LC. BACCHANTE X LC. PRINCESS MARGARET V. MAGNIFICA—Profuse, large dark flowers should result—Fall.	Com. Pots	1.50
2088	LC. TREMPLEAU X C. PEETERSII—Good production of large, medium dark flowers. CONTROLLABLE—Fall.	2 1/4" Com. Pots	2.50 1.00
2090	C. TETHYS X LC. BACCHANTE—Unusually dark Tethys combined with a large dark Bacchante with fine large lip should produce outstanding result—Fall.	Com. Pots	1.50
2104	C. LABIATA X LC. HELEN WILMER—This combination should result in rich color and exceptionally fine growth. CONTROLLABLE—Fall.	Com. Pots	1.00
2111	LC. CARRIE GOLDFARB X LC. MIRABELLE, BRONZE AWARD, O.D.C.—Proven parents should produce fine large, dark hybrids—Fall.	Com. Pots	1.50
2114	LC. GOVERNOR GORE X C. LABIATA—Emphasis here should be on substance and shape, CONTROLLABLE—Fall.	Com. Pots	1.00
2125	C. LABIATA X LC. MOMUS V. BRINDIR, A.M., R.H.S.—Vigorous, medium to dark lavender with fine shape. CONTROLLABLE—Fall.	Com. Pots	1.50
2162	LC. MAMIE EISENHOWER X C. TITYUS—Should produce the typical Mamie Eisenhower, large, medium lavender flowers with Tityus contributing labellum color—Spring.	Com. Pots	1.50
3047	LC. MAMIE EISENHOWER X C. LABIATA—Labiata should contribute vigorous growth to the large medium lavender flowers of fine substance of the Eisenhower parent. CONTROLLABLE—Fall.	Com. Pots	1.50

All white flowers

Cross No.	Description	Pot Size	Price
2121	C. ANN ALBERTS X BLC. MERU—Proven parents should produce large white to pale lavender flowers with beautifully fringed labellum—Summer and Fall.	Com. Pots	\$1.00
2160	C. ANN ALBERTS X C. BOB BETTS—Should result in a fine white with excellent shape and substance—late Fall.	Com. Pots	1.00
2173	C. JEANNE PATTERSON X C. DOROTHY MACKAIL—A good white Cattleya for spring, growth is excellent—Spring.	Com. Pots	1.50

White with colored labellum

2066	(LC. BLANCHETTE X LC. LORNTHIA) X LC. MARY MARTIN—Large white petals with fine shape and excellent colored labellum, peaks in—Summer.	Com. Pots	1.50
2101	LC. FLORENCE PICKARD X LC. SNOWDRIFT—Good quality, white petals with colored lip—early Fall.	Com. Pots	1.50
2102	LC. SNOWDRIFT X LC. FLORENCE PICKARD—Reverse of 2101, but using a different Lc Snowdrift parent plant—early Fall.	Com. Pots	1.50
2135	LC. LILY PONS X LC. FLORENCE PICKARD—Combination of these two parents should produce flowers with good substance, and excellent lip color—late Fall.	Com. Pots	1.50

Yellow flowers

2189	LC. GOLDEN RAY X LC. PLYMOUTH—Good, yellow flowers of medium size, and full, round red labellum—Summer and Fall.	Com. Pots	1.00
3015	C. BICOLOR X BLC. MIDAS—Midas is a medium size, yellow flower, with fine substance. Combined with the bronze bicolor, we expect shades of bronze to yellow—late Summer.	Com. Pots	1.00

Interesting novelties, varied colors

2030	C. GRANULOSA X LC. ETHEL MERMANN—Yellow-bronze combined with white-with-colored labellum, has been a very vigorous grower—Spring.	2 1/4" Com. Pots	2.50 1.00
2146	(C. LABIATA X C. HARRISONIAE) BERTII—Labiata parent is an excellent dark, and the combination should produce upright sprays of five to seven Harrisoniae type flowers—variable, Fall.	Com. Pots	1.00
2185	C. HIGHBURIENSIS (C. HARRISONIAE X C. MOSSIAE)—Lavender flowers with good substance, often flowering twice yearly. Grows well in the home—variable.	2 1/4" Com. Pots	2.50 1.00
2186	C. HARRISONIAE X LC. GOVERNOR GORE—An exceptional Governor Gore, should produce small to medium pink-lavender flowers. Grows well in the home—Spring.	2 1/4" Com. Pots	2.50 1.00

SPECIES

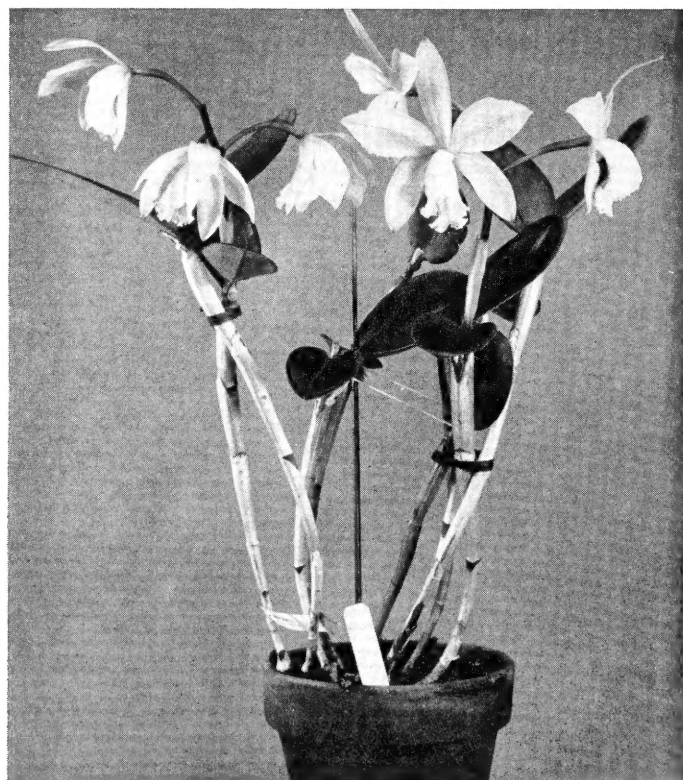

Plant Name and Description	Size	Price
C. BOWRINGIANA —Five to twenty flowers per spike, small, rose-purple petals and sepals, with plain, darker labellum—Fall.	5" 6" 7"	\$ 5.00 - \$ 7.50 7.50 - 10.00 12.50 - 15.00
C. DOWIANA —Handsome yellow flowers, with a striking rich crimson-purple labellum—Fall.	5" 6"	7.50 - 10.00 10.00 - 15.00
C. GASKELLIANA —Light to medium lavender—late Spring.	5" 6"	5.00 - 12.00 10.00 - 15.00
C. WARSCEWICZII —(Also known as C. Gigas) Rose lavender sepals and petals, with darker lip set off by touches of yellow in the throat—Summer.	5" 6"	6.00 - 10.00 7.50 - 12.00
C. LABIATA —Lavender petals and sepals, with darker contrasting labellum—Fall. See photograph below.	5" 6"	7.50 - 10.00 10.00 - 15.00
C. LODDIGESII —Lavender petals and sepals, with darker labellum—Summer.	5" 6"	7.50 - 10.00 10.00 - 15.00
C. LODDIGESII, VAR. HARRISONIAE —Lilac or darker petals and sepals—Summer. See photograph below.	5"	7.50 - 10.00

C. LABIATA—Shown flowering for the fourth consecutive year in a window collection

Plant Name and Description	Size	Price
C. MENDELII —Lavender flushed petals, with dark lip—late Spring.	5" 6"	\$ 7.50 - \$10.00 10.00 - 15.00
C. MOSSIAE —"The Easter Orchid". Light to medium lavender sepals and petals, set off by a touch of darker color in the throat—Spring.	5" 6"	6.00 - 10.00 10.00 - 15.00
C. PERCIVALIANA —Lavender, with dark lip—late Fall and Christmas.	5" 6"	7.50 - 10.00 10.00 - 15.00
C. SKINNERI —Attractive medium lavender sepals and petals, with darker labellum—late Spring.	5"	6.00 - 12.00
C. WARNERI —Medium lavender petals and sepals, with darker, contrasting labellum—June.	5" 6"	6.00 - 10.00 10.00 - 15.00
LAELIA AUTUMNALIS — Rose lavender petals, with a touch of white at the base of the labellum—late Fall.	5"	6.00 - 12.50
O. GRANDE —"The Tiger Orchid". Waxy flowers, predominately yellow, marked with mahogany brown—Fall.	5" 6"	6.00 - 10.00 10.00 - 15.00

C. LODDIGESII V. HARRISONIAE

CYMBIDIUMS

Semi-terrestrial plants bearing long lasting sprays of flowers in a full range of beautiful pastels, usually set off by interesting touches of deeper colors. May be grown outdoors in frost-free areas.

The listing of flowering size plants below is only partial. We shall be glad to send additional listings upon request: Flowering Size Cymbidium List No. 1, priced from \$8.50 to \$50.00, including good average types, or Flowering Size Cymbidium List No. 2, priced from \$50.00 and up, including above average quality flowers, of fine clear colors.

Flowering size plants

Plant Name	Parentage and Description	Size	Price	Plant Name	Parentage and Description	Size	Price
CYM. BEATRICE SUPERBA	(Parents unknown)—Large greenish flowers, with outstanding red banded labellum. One of the easiest Cymbidiums to flower—Winter.	6" 7"	\$15.00 - \$30.00 20.00 - 40.00	CYM. ERICA SANDER	(grandiflorum x Pauwelsii)—Beautiful apple green sepals and petals, brownish maroon spots on cream white labellum—Winter.	6" 7"	\$15.00 - \$30.00 20.00 - 40.00
				CYM. PAUWELSII	(insigne x Lowianum)—Cream to tan sepals and petals, labellum spotted brown to maroon, tall flower stems—Winter.	6" 7"	7.50 - 15.00 10.00 - 20.00

CYMBIDIUM SEEDLINGS

Early flowering

A special group of well-grown plants, most of which are the sought-after early (December, January) flowering types, in the most popular colors.

Prices

12 in. to 18 in. leaves . . .	\$5.00
18 in. to 24 in. leaves . . .	7.50 (bulb and first growth)

Cross No.	Description	Cross No.	Description
1701—STUDLEY X PRINCESS ELIZABETH	This Princess Elizabeth plant is not an Alexanderii, W'birt hybrid. Progeny should be yellow, cream and pink. Both parents flower before January 15th—Season early.	1736—SHERWOOD FOREST X SICILY	This Sicily is an early, large, green flower. Both parents have excellent spike habits. Good green flowers, with some yellows are expected—Season early.
1709—ATLANTIS X STUDLEY	Progeny should be pink, cream, and possibly white. Both parents flower prior to January 15th—Season early.	1754—VENUS X LOWIO-GRANDIFLORUM	Both greens. Lowio-grandiflorum has flowered every year for the past ten years before January 15th. Some yellows are expected—Season early.
1716—LYMINGTON X ERICA SANDER	Tan, yellow, and green flowers should result. This Lymington has generous spikes of large flowers, always appearing prior to January 15th—Season early.	1755—VENUS X ERICA SANDER	Green flowers, with some yellows are expected. The Erica Sander has lovely, clear green sepals and petals, with a maroon spotted labellum. Should flower before mid-season peak.
1717—LYMINGTON X ATLANTIS	We expect yellow, cream, pink, and white flowers, with spotted labellum. Both parents consistently bloom before January 15th—Season early.	1760—BLUE SMOKE X SHERWOOD FOREST	Good greens should predominate here. Lips should be fine, with many having solid maroon bars—Season early to middle.
1721—DORIS X SHERWOOD FOREST	The Doris has large, fine spikes, with good quality for a Tracyanum hybrid. Progeny should be cream, yellow, and possibly green. Flowering should precede the Cymbidium season's peak.	1775—BEATRICE SUPERBA X ALEXANDERI WESTONBIRT	This Beatrice is one of the most consistent flowering plants we have. Flowers should be large, and yellow, cream or white in color.
1723—ERICA SANDER X SHERWOOD FOREST	Two good greens are combined here, hence greens should predominate, although there will be some yellows, also. Should flower before the big mid-season peak.	1769—ROBIN HOOD X SHERWOOD FOREST	Both greens with solid maroon and red labellums—Season early to middle.

UNUSUAL ORCHIDS

For those of you who are searching for the "different" orchid, one or more of these plants is a "must". We have gathered this fine collection of unique orchids from all over the world, and have held them in our ranges until they are completely re-established. Shipped in pots, and when ordered in season, in bud.

If you prefer to "grow your own", that is, spend the time and effort involved in re-establishing them yourself, at a substantial savings in original purchase price, please write for details. When ordered out of season and out of pot, the special Do-It-Yourself Terms apply (see inside front cover).

Plant Name and Description	Size	Price
BRASSAVOLA NODOSA —(Lady of the Night) Interesting flowers of white, with a green cast. Very fragrant after nightfall—Autumn.	5"	\$ 6.00 - \$10.00
BRASSIA CAUDATA —The long, narrow sepals in contrast to short petals. Yellowish-green, with dark brown and red-brown markings—Summer.	4"	7.50 - 10.00
BRASSIA GIREOUDIANA —Sepals and petals yellow, tinted with green, brown spots—Summer	5"	7.50 - 10.00
BRASSIA MACULATA —Long narrow sepals, short petals, yellowish green, spotted with brown. Creamy lip, spotted with purple and brown—early Summer.	5"	7.50 - 10.00
BROUGHTONIA SANGUINEA —Reddish purple sepals and petals—Fall and various.	5"	7.50 - 10.00
CATTLEYA BICOLOR —Bronze green sepals and petals, with a rose purple labellum, usually margined with white—Summer.	5"	7.50 - 10.00
CATTLEYA FORBESII —Light yellow sepals and petals, with red streaked labellum—Spring and Summer.	5"	10.00
CATTLEYA GUTTATA —Beautiful chartreuse green sepals and petals, with markings of clear maroon red—Summer.	5"	7.50 - 12.50
CATTLEYA WALKERIANA —Soft rose petals and sepals, with a deeper rose labellum—Winter	5"	10.00 - 12.50
CYCNOCHES CHLOROCHILON —(The Swan Orchid) Delicate, golden green, with white centers. Center portions of the flowers are in the form of a swan. Deciduous, dormant after flowering—Fall and Winter.	5"	7.50 - 12.50
CYMBIDIUM FINLAYSONIANUM —Narrow sepals and petals, borne on pendant spikes. Tawny red with touches of deeper red, yellow and white—Summer.	6"	7.50 - 12.50
EPIDENDRUM AUTROPURPUREUM —Handsome flowers with green petals and sepals, marked with rich brown. Lip white, with crimson—early Summer.	5"	7.50 - 10.00
EPIDENDRUM CILIARE —Sepals and petals greenish white, with lovely fringed labellum—Winter.	5"	6.00 - 10.00
EPIDENDRUM CINNABARINUM —Scarlet flowers, with an orange-yellow labellum—Summer.	5"	6.00 - 10.00
EPIDENDRUM COCHLEATUM —Yellowish green, very narrow sepals and petals, with a very deep purple lip—various.	5"	6.00 - 7.50
EPIDENDRUM FRAGRANS —Creamy white sepals and petals with labellum touched with red-purple—Summer and Fall.	5"	7.50 - 12.50
EPIDENDRUM MARIE AMES —Large white labellum, with narrow greenish white petals and sepals—Spring and Summer.	5"	6.00 - 10.00
EPIDENDRUM NEMORALE —Delicate rose-mauve flowers, borne on graceful sprays—Summer.	5"	6.00 - 10.00
EPIDENDRUM VITELLINUM —Cinnabar red, with yellow labellum. Flowers are borne on sprays—Autumn.	5"	6.00 - 10.00
LAELIA ALBIDA —Medium sized flower, with white petals and sepals, set off by a rose labellum—Winter.	5"	6.00 - 7.50
LAELIA ANCEPS —Medium sized flower of light lavender, with a darker rose-purple labellum—Winter.	5"	6.00 - 10.00
LAELIA CINNABARINUM —Small, bright red flowers—Spring	5"	7.50 - 10.00
LAELIA CRISPA —White petals and sepals, with a bright purple labellum—Summer.	5-6-7"	7.50 - 15.00

CYPRIPEDIUMS

The "Lady Slipper" Orchid

Among orchids, one of the most beautifully colored and marked flowers. Long lasting, up to six weeks on the plant, its unusual form resembles a lady's slipper, hence its nickname. Flowering season is variable, peaking in Winter.

The listing below is only partial. We have many more excellent quality hybrids available. For information on special colors or crosses, please write.

Flowering size *Cypripediums*

Plant Name and Description	Size	Price	Plant Name and Description	Size	Price
CYP. BELLATULUM (Species)—White petals and sepals with pin dots of maroon. Borne on short stems.	4" 5"	\$ 5.00 - \$ 7.50 6.00 - 10.00	CYP. INSIGNE V. SANDRAE (Species)—Entirely yellow-green except for white border on the dorsal.	4" 5"	\$ 5.00 - \$10.00 7.50 - 12.00
CYP. CALLOSUM (Species)—Dorsal sepal white, shaded to green at base, and striped with dark crimson. Petals pale green and pouch brown-purple.	4" 5"	6.00 - 12.00 7.50 - 15.00	CYP. MACAW (Jura x Swallow)—Large size, pouch and petals green, very heavily marked in sorghum brown. The dorsal is light green at base, changing to white and marked with perilla purple dots.	4" 5"	10.00 - 15.00 15.00 - 25.00
CYP. CONCOLOR (Species)—Flowers light yellow, speckled with small deep red dots. (See photo).	3" 4"	4.00 - 7.50 6.00 - 12.00	CYP. MARTIN (Bourton Lady x Swallow)—Especially attractive because of raised large dark spots on the green and white dorsal sepal and petals. Pouch is contrasting solid russet.	4" 5"	10.00 - 15.00 15.00 - 25.00
CYP. INSIGNE (Species) — Petals and pouch tan to brown shades, dorsal sepal with chocolate brown spots.	4"	5.00 - 12.00	CYP. MAUDIAE (callosum Sandrae x Lawrenceanum, Hyeatum)—Universal favorite because of its lovely mottled green foliage, and fine green and white long-stemmed flowers.	4" 5"	7.50 - 15.00 10.00 - 30.00
CYP INSIGNE V. HAREFIELD HALL (Species)—Similar to insigne species, but larger flower, with much larger chocolate brown spots.	4"	7.50 - 15.00	CYP. PYRAMUS VAR. MAGNIFICUM (Hera (Euraydes) x Mrs. Wm. Mostyn)—Large, beautifully marked flower. Pouch and petals green, heavily marked sorghum brown. Dorsal light green at base, changing to white, marked with perilla purple dots.	5" 6"	15.00 - 25.00 20.00 - 30.00
			CYP. ST. ALBAN (Antigone x Harrisianum)—Exciting medium sized flower, with deep mahogany red pouch and petals. Dorsal sepal has mahogany red sunrise shading to white at sides and up.	4" 5"	5.00 - 10.00 7.50 - 15.00
			CYP. ST. MILO —White margin, brown spotted dorsal with green background. Petals and pouch rich polished mahogany brown.	4" 5"	5.00 - 7.50 7.50 - 10.00

VANDA ROTHSCHILDIANA

VANDAS

Flowering size

Varieties listed below are strap leafed varieties which flower profusely in the glasshouse. Beautiful round flowers that offer some unique colors. Some plants will flower as many times as six a year. Additional listings available.

Plant Name and Parentage	Size	Price
VANDA CHIMEY WALKER (V. Flammerole x V. Sanderiana) — Delicate lavender flowers with darker lavender labellum. Pinpoints of darker lavender arranged vertically on sepals and petals—various.	7" 8"	\$18.00 - \$25.00 20.00 - 35.00
VANDA EISENHOWER (V. Ellen Noa x V. Sanderiana)—Buff to green, with a rose overcase. Excellent shape and size—various.	7" 8"	25.00 - 40.00 30.00 - 50.00
VANDA MANILA (V. luzonica x V. Sanderiana)—Petals and sepals suffused in varying degrees with pink lavender. Reddish purple pinpoints of color arranged vertically on sepals and petals. Bright reddish-purple labellum—various.	7" 8" 9"	15.00 - 20.00 18.00 - 25.00 21.50 - 35.00
VANDA MERLE KAWAMOTO (V. Charlana x V. Sanderiana)—Pink flowers with lavender pink pinpoints and veins of darker color arranged vertically on sepals and petals. Pinkish-green labellum—various.	7" 8" 9"	18.00 - 25.00 20.00 - 35.00 25.00 - 40.00
VANDA ROTHSCHILDIANA (V. coerulea x V. Sanderiana)—Blue flowers suffused with white. Darker blue veining, dark blue labellum—various.	6" 7"	18.00 - 25.00 20.00 - 25.00
VANDA WAIKIKI (V. Boschii x V. Sanderiana)—Fine shape combine pink and red with yellow to brown background—various.	7" 8"	18.00 - 25.00 20.00 - 35.00

ANTHURIUMS

Perfect companions for your orchid plants, providing a backdrop of brilliant green foliage, and perhaps, blooms at a time when your orchid plants may be 'tween seasons.

Prolific flower production with proper care, a new bloom appearing almost as soon as the old one fades. The plants need filtered sunlight, and a generally bright, warm location. Keep damp always, but not dripping.

1587—SAN SONGER (Reve Rose x Marmousset)—	All pink flowers of medium size. Some will be richly colored.	3"	2.50	1591—LA BELLE (Schilleriana x Marmousset)—	Vigorous, many flowered sprays of medium to dark pink flowers should result from this cross.	3"	2.50
		4"	4.00				
				1631—(WINGED VICTORY X DAWN MIST)—	A white, with extremely fine substance is expected here.	3"	2.50

STAGES OF CATTLEYA — from Seed Pod to Flowering Plant

YOU HAVE A PLACE TO GROW ORCHIDS

As house guests, orchid plants leave almost nothing to be desired. They are adaptable, pleasant to behold, and a source of constant interest and delight. Their "guest room" might be over the sink in the kitchen, in the living room, or in a sunny enclosed porch—any place about the home where the temperature does not go, roughly, below 60° F.

We give below a few simple directions for the better known families in the orchid tribe. Should you want more detailed information, write for our free folder, or purchase one of the excellent recent books on orchids you will find listed on page 21 of this catalog.

To Find a Growing Area

Select a bright window in your home, removed from drafts, where your plant will get morning and afternoon DIRECT sun. The plants need be protected only from burning, midday summer sun in a window collection. If you have one of the newer picture windows, you may adjust for the additional light by placing your plant back 18 to 36 inches from the window, but **KEEP YOUR GROWING AREA BRIGHT.**

In colder areas, it may be necessary at times to move the plant back from the windows, as protection from the cold panes.

Providing Extra Humidity

In the growing area, set the pots on pebbles in a tray, as illustrated. Keep the pebbles wet, but water level should be **below** the surface of the pebbles, so the air will circulate under the bottom of the pot, and

pick up moisture from the pebbles. Exceptions to this rule are Cyripediums and Cymbidiums, both of which may rest in the water for some time with beneficial results. You may use any sort of pebbles you wish. We have small packages available (see page 21) but any pebbles which may be available in your locality will be fine.

Temperature Requirements

Orchids are not at all the delicate plants most people think they are. Within loose bounds, they will adapt readily to conditions offered by any modern house. Usually, for growing purposes, we group them into three temperature classes:

THE MEDIUM TYPES are represented by Cattleyas, Epidendrums, mottled leaf Cyripediums, and such lesser types as Oncidiums, and others. The ideal minimum is 62° F. nights, with high 70's days. Considerable OCCASIONAL deviations will have no effect, since most orchid

plants adapt themselves so readily to temperature conditions, just as they do in their native habitat.

THE COOL TYPES are represented by the *Odontoglossum grande*, *Cymbidiums*, and plain leaf *Cypripediums*, among others, and should be kept five degrees cooler than the medium types.

THE WARMER TYPES are represented by the *Phalaenopsis* and *Vandas*. They should be kept five degrees warmer than the medium types.

To Water Your Orchids

Again, not all orchid plants have the same moisture requirements. They may be grouped into three categories, according to their differing needs:

CATTLEYAS, LAELIOCATTLEYAS, BRASSOLAELOCATTLEYAS, ONCIDIUMS, are epiphytes, or "air-rooted" types, with built in water tanks called pseudobulbs. They like a minimum of moisture, with a chance to dry out between waterings. In normal weather, a 6 inch pot of this type will need about three cups of water every five days or so. In very hot, dry weather, the five day period may be decreased to three or four, and in cool, wet weather, increased to six or seven. The important thing to remember is to keep this group on the dry side.

PHALAENOPSIS, and VANDAS, while also epiphytic, do not have the built-in water tanks for storage, and their requirements are about the same as any ordinary house plant. Water enough to keep the potting mixture DAMP but not DRIPPING at all times.

CYPRIPEDIUMS and CYMBIDIUMS are yet another type. These are known as semi-terrestrials, or terrestrials, which means "earth-rooted", and they need an abundance of moisture at the roots to do well. Unlike the other two groups, they do not mind wet feet and the bottom of the pots may stand in water for some time after watering.

In watering all types, just pour the water into the top of the pot. Much will seem to drain through the drainage hole in the bottom, but more is retained by the porous, absorbent potting mixture than you would think. In determining when to re-water, the best practical test is to feel the potting compound, not just the surface, but stick your fingers into it. It will feel harsh and dry to the touch if it needs water. If still damp, your fingers will note the moisture.

Feeding Your Orchids

Most orchids suggested today for the home are potted either in osmunda, or shredded fir bark, such as our own WONDERBARK. How much and how often

you feed is determined by which type potting material is used. Plants potted in WONDERBARK should be fed two or three times as often as those planted in osmunda.

For feeding the plants, use any of the new, totally water soluble commercial orchid feeds, as listed on page 21 of this catalog. Just add the fertilizer to the regular watering, following manufacturer's directions as to concentration. Also, when you water, do not be afraid to run water through the pot to rinse away excess deposits of feed (salts) which may be harmful if allowed to accumulate.

Repotting Your Plants

When the plant growth outgrows the pot, or every two years, it is time to repot. Most plants today are potted in WONDERBARK (fir bark), rather than the traditional osmunda, because the bark mixtures are as simple to use as ordinary soil, and do not require the special techniques of osmunda. See inside of back cover for the easy 1, 2, 3, 4 steps.

Above All, Enjoy Your Plants

When the plant is in bloom, you may remove it to any part of the house best suited as a background for its beauty. Leave the pebbles and gravel behind in the growing area, and try one of the attractive cover pots advertised on page 22 of the catalog, or perhaps you would prefer an expandable bamboo sleeve, illustrated on page 20. This is your big moment, make the most of it. Then when the blooms fade, clip back just the flower stem itself, without cutting leaves or bulbs, and return the plant to the growing area for the next year's blooms to develop.

Orchids are free from plant pests, and almost never will they need spraying of any sort. If you think they may, write, describing symptoms, and your present care. We are glad to give this information FREE OF CHARGE at any time.

Wonderbark

Makes potting as easy as
One
Two
Three
Four

At last, a product to take the tedium out of potting! No doubts now as to whether you have potted properly.

Step 1. Saturate Wonderbark before potting. Position the plant in an unglazed clay pot, with oldest part (backbulb) of plant against one side, and rhizome horizontal, as illustrated. Make sure the pot is large enough to provide space for two additional new plant growths before plant will reach other side of the pot. Photo shows one new growth begun, with plenty of room for another.

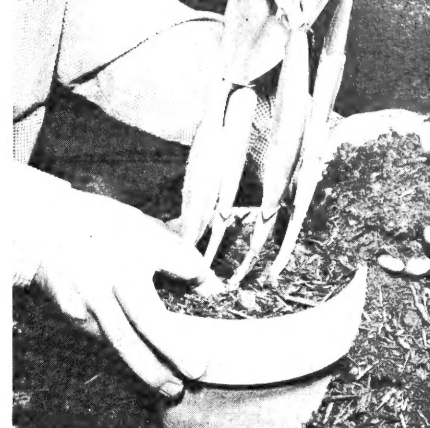

Step 2. Simply pour Wonderbark about the roots, make sure spaces between roots and at the bottom of the pot are completely filled. Fill pot to overflowing.

Step 3. Tamp Wonderbark down with thumbs, as illustrated, thumping pot on table to settle bark between roots. Level of Wonderbark should come to within one-half inch of top of pot. Remove excess, if any.

Step 4. Center wire stake in pot beside rhizome, and push to bottom of pot. Tie growths to stake loosely, by looping soft string at top of pseudobulb, just below leaf.

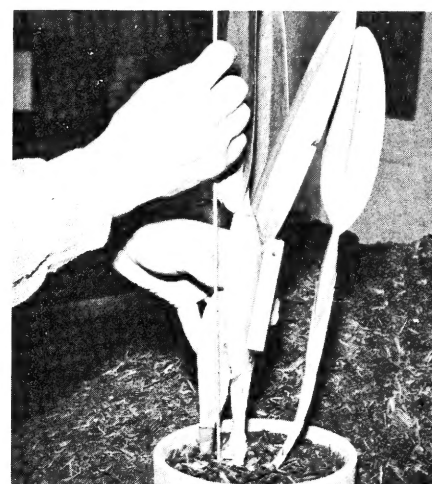

STEP 1

STEP 2

STEP 3

STEP 4

Subsequent care is the same as with conventional potting material, except that you must feed regularly with one of the special orchid fertilizers, recommended on page 21. Follow manufacturer's directions as to use.

Wonderbark is as big a boon to orchid growers as was sliced bread to housewives. Discovered through the efforts of the lumbering industry to utilize by-products, it is the shredded bark of the **abies concolor**. Results with all types of orchids to date have been astounding—unprecedented root growth, fine, hard foliage growth, and good, strong flower production—all at less cost, time and effort on the part of the orchid grower, whether large or small. Try some!

PRICE LIST — f.o.b. South San Francisco

Orchids as GIFTS

The gift for everyone, for every occasion

BIRTHDAYS ANNIVERSARIES MOM or DAD CHRISTMAS
EASTER THE HOSPITALIZED OPENINGS SHUT-INS
TO SAY "HELLO" or "THANK YOU"

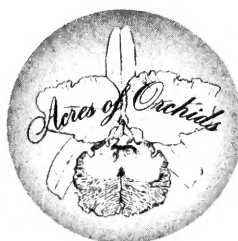

Probably no other single thing you could buy is so right to say so many different things so appropriately, as does an orchid plant delivered in bloom on that special day. Whether it is meant to mark a special occasion, such as a debut or business opening and be disposed of, or whether you are looking for that elusive gift that continues to give, an orchid plant is a perfect answer. So many have gained a new interest in living through their orchid collections, started originally by a gift from some thoughtful friend.

Plants delivered locally are packaged in the attractive window gift carton pictured. Gifts to be shipped are safely secure in the special shipping carton. We will be glad to enclose a seasonal card, or send along your own, with your order. Full instructions on care enclosed in each package, for the potential collector. Write, call, or drop in the next time you are searching for **THE** perfect and unusual gift.

A free flower show every day at **"ACRES OF ORCHIDS"**

We just love visitors and visitors just seem to love us! Our orchid collection, gathered from the far corners of the world, is one of the most extensive you will see anywhere. As a bonus, there is greenhouse after greenhouse jammed with carnations, roses, eucalyptus, gardenias, and many other flower crops, just waiting for your inspection.

Free tours are conducted by specially trained guides twice every day in the week, at 10:30 and 1:30, and special arrangements are gladly made for groups. Drop in, and bring your friends, we shall be delighted to see you.
